

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

## PREFACE.

---

Of this new Abridgment of Ainsworth's Dictionary, it will not be necessary to give any very lengthened or detailed account. The plan was suggested by the Proprietor, who considered, that, if he furnished the Tyros in Latin with all that was required for them in a convenient form and at little more than one-half the usual price, he would do a service to the community. With this view, he has spared no expense, and the Editor has exerted his best efforts, that the Work may be both complete and accurate.

In the English and Latin part, the Editor was to retain the best Latin words and expressions; but to exclude all which he might judge superfluous or inappropriate. At first sight, the last appeared easy, but was found often difficult. It frequently required much consideration before a choice could be made of the words to be retained, and those that would fall to be blotted out. In several instances, many suitable words or expressions were added, for which the Editor is, of course, responsible. Abridgment formed an essential part of the plan, yet it was not intended to suppress any thing which, to the young scholar, was of importance. Studying particularly the interest of the latter, and trusting to the liberality of the Proprietor, the Editor has allowed this part of the Work to remain considerably more extended than was either wished or anticipated.

With respect to the Second Part, nothing was expected from the Editor except removing all the Latin examples. To accomplish that, little time or mental exertion seemed necessary. As he proceeded, the duty required deeper thought and more anxious consideration, than would have been previously imagined. Of the explanations, many were nearly synonymous, others did not depend on the proper meaning of the word under discussion, but on the other terms with which it was conjoined in a particular sentence. To change such translations, and to adhere as closely as possible to the original meaning, was judged a benefit to the young student. Too many senses given to one word often bewilders the untutored mind, particularly at first, and with boys of slow capacity. Perhaps the Editor might without injury to the Work have carried retrenchment in this respect still further, had the original design permitted.

In the inflections of verbs, especially those of the first conjugation, every classical scholar knows, that Ainsworth varied his mode as the work proceeded. Towards the beginning, he gives only the first and second persons singular of the present of the indicative active, leaving the scholar to infer that the verb is regular, a supposition which, in some instances, would lead to mistake, yet no blame can attach to him. The fault lies with the lexicographer. As the Author advances, he frequently gives the first person singular of the present of the indicative, and the present of the infinitive. It may be added, that in the passive voice, he sometimes has only the first person singular of the present of the

indicative, in others the present of the infinitive is likewise given, and not unfrequently the perfect participle. To obviate these difficulties, extremely perplexing to the weak mind, all the verbs are fully conjugated. From his own experience, the Editor knows it will save much labour both to Teacher and Scholar. To adjectives which are irregular in declension, the genitives are almost uniformly subjoined. Adverbs are frequently compared, and their roots inserted; the same method has been followed with adjectives, unless when they fell under general rules. Several other alterations have been introduced for the sake of the young Latin scholar, which the Editor hopes will meet the approbation of the candid and impartial judge.

Of the other improvements, whether from supplying omissions or correcting inaccuracies, some perhaps original, or the effect of careless printing, the Editor shall say nothing. What to the advanced scholar may appear trivial, to beginners may be of important advantage, by quickly solving a difficulty, or superseding tedious and sometimes fruitless research, exceeding the power of their intellect. Languages cannot be acquired without great labour, but the irksomeness of the study at first may be much relieved by judicious and reasonable assistance. In a Dictionary, too much cannot be done to facilitate the exertions of youthful genius. Translations and *ordo verborum* ought never to be seen by the learner, on whose mind the faithful Teacher cannot too earnestly or too frequently impress the absolute necessity of the frequent use of his Dictionary. To attempt translation without a distinct and accurate knowledge of each word, is a gross deception on both parent and scholar, nor does its frequency, of late years, diminish its injurious tendency, or justify its adoption.

Considering the smallness of the Volume and nature of the Work, some may be of opinion that greater detail has been given than propriety demanded. The Editor has only to add, that, for the sake of the learner, he has neglected nothing which accurate and complete information, or readiness of consultation appeared to require.

From the great reduction in size, the public may be apt to suppose that there has been not only an abridgment of the articles, but a diminution of their number. On examination, the reverse will be found to be the case; for several additional articles have been inserted which will not be found in former Editions, but were deemed necessary to complete the intention of the Editor.

The preposition must be omitted, when the structure of the Latin words renders it superfluous; as, *He has a kind of covetous fellow to his father, habet patrem quendam avidum. What a woman have you to your wife? quid mulieris uxorem habes!*

To, before a verb, is generally a sign of the infinitive mood; as, *To despise money at a proper time is sometimes the greatest gain, pecuniam in loco negligere maximum interdum est lucrum.*

To, before a verb, may be also rendered into Latin other ways; viz.

By a gerund in *di*; as, *Resolved to go, certus eundi.*

*To be short, brevis, ne multa, ut paucis complectar.*

*To be, before a participle of the preterperfect tense, is generally rendered by the infinitive mood of the passive voice; as, He desires to be thought rich, cupit haberi divem.*

But it may be also turned into Latin several other ways; as, *They praise those things which are not to be praised, laudant ea, quæ laudanda non sunt. It is openly to be sold, palmæ est venale. They may seem filthy even to be spoken, dictu quoque videantur turpia.*

*He desired to be taken up into his father's chariot, optavit ut in currum patris tollere-*

*tur. He will not be fit to be sent, non erit idoneus qui mitatur.*
